Introduction

The New Jersey Statutes Annotated, 13:1E-20, requires that a district solid waste management plan contain provisions for automatic review by the Board of Chosen Freeholders not less than once every 2 years following approval by the Department of Environmental Protection.

Cumberland County has reviewed its Plan and has determined that revisions are necessitated by events of the past 2 years, in addition to proposed amendments to the Plan.

This report updates the information provided in the Cumberland County Solid Waste Management Plan (1979), the Modifications to Cumberland County Solid Waste Management Plan (1980), and the Certification of Approval with Modifications of the Cumberland County District Solid Waste Management Plan (1981).

Table 1 - Narrative

Solid waste generation in Cumberland County, as reported by haulers in 1980, totaled 187,770 tons, as shown on Table 1A. Of this amount, approximately two-thirds was of non-industrial types. An additional 11,000 tons of sludges, toxics, and liquids were also reported. These waste types, as well as some of the waste shown on Table 1A, probably were not landfilled in Cumberland County.

Actual tonnage probably was less than the records indicate because much waste is hauled by individuals, industries, and private haulers that do not use compactor trucks. Waste flow may actually be declining because of decreased industrial activity, several large plant closings and reductions, slowing population growth, greater conservation of consumer goods, and recycling activities of individuals and industries.

Two other sources of information have been used to estimate solid waste generation. Table 1B contains information in cubic yards from the Board of Public Utilities. Table 1C contains an estimate in cubic yards of total solid waste generation based upon the BPU information, estimates by municipal officials, and the Solid Waste Management Plan.

EXISTING SOLID WASTE GENERATION

Waste Types (Tons/Year)

Table 1A

Selected Cumberland County Landfills, 1982

Landfill(a)	Recorded Cubic Yards January 1 to June 30	Estimated Cubic Yards 1982
Bridgeton	41,167	83,000
Millville	56,349	114,000
Upper Deerfield	13,591	29,200
Vineland	<u>146,600</u>	<u>295,000</u>
Total	257,707	521,200

SOURCE: New Jersey Board of Public Utilities

(a) These four landfills account for 85 percent of the estimated total volume of solid wastes disposed in Cumberland County. Thus, the yearly volume of solid wastes entering landfills is estimated to be approximately 600,000 cubic yards per year for Cumberland County.

Landfill	Waste Source	1983 Volume(a) (cubic yards)
Bridgeton (0601A)	Bridgeton Stow Creek/Shiloh Upper Deerfield	83,000 (b) 5,700 (c) <u>22,500</u> (c, d)
	Sub-Total	111,200
Commercial (0602A)	Commerical	3,800 (e)
Deerfield (0603A)	Deerfield	1,500 (c)
Downe (0604B)	Downe	2,200 (e)
Fairfield (0605A)	Fairfield	3,000 (c)
Hopewell (0607A)	Greenwich/Hopewell	2,900 (c)
Lawrence (0608C)	Lawrence	3,200 (e)
Maurice River (0609B)	Maurice River	12,800 (c)
Upper Deerfield (0613A)	Upper Deerfield	7,500 (c, d)
Vineland (0614B)	Millville Vineland Various unidentified	114,000 (b) 295,000 (b) <u>48,000</u> (e)
	Sub-Total	<u>457,000</u>
	Total	605,100

(a) 1983 volumes are assumed to be equal to 1982--no factor is assumed for growth and no reduction is assumed for recycling.
(Based on reports for January 1, 1982 - June 30, 1982)

(b) 1982 volumes are as reported to the New Jersey Board of Public Utilities.

(c) 1982 volumes are as estimated by municipal officials.

(d) Upper Deerfield will accept individually delivered household wastes (no dumping fee) for a six-month period; all other wastes will be redirected to Bridgeton.

(e) Volumes projected by multiplying tonnage in Solid Waste Management Plan by 4.7 cubic yards per ton.

Table 2 - Narrative

Two landfills have closed since the Cumberland County Solid Waste Management Plan was approved in March 1981. Waste from Stow Creek is being placed in a "greenbox" at the closed township facility and is then hauled to the Bridgeton landfill. The Borough of Shiloh, which previously used the Stow Creek Township facility, began curbside collection with final disposal in Bridgeton. Millville waste has been directed by the Department of Environmental Protection and the Board of Public Utilities to the Vineland landfill. A "greenbox" is soon to be located at the site of the former Millville landfill for the convenience of residents as an adjunct to curbside pickup. The Upper Deerfield landfill is expected to reach capacity during 1983. It is accepting only privately delivered residential waste.

Recent estimates (February 1983) of landfill capacity in Cumberland County indicate space to accommodate the solid waste for approximately one and one-half years at present rates. Planned recycling activities and continued decreased industrial and commercial waste generation due to economic decline will allow some additional space. The estimated 350 tons per day generation rate is expected to continue through the planning period.

Some municipalities may need to seek interlocal service agreements with municipalities having excess space or to transport waste to a BPU regulated landfill before the planned opening of the new county landfill in 1985. It is planned that all existing municipal landfills be closed by December 31, 1984. The July 1983

Amendments to the Cumberland County Solid Waste Management Plan
authorize this change from the original Plan approval.

Table 3 Narrative

Proposed Interdistrict Waste Flow Policy

The goal of this updated solid waste management plan is to accommodate all of the non-toxic, nonhazardous wastes generated within the County. Waste types 17, 70, and 76 will continue to be hauled by private contractors to approved disposal sites outside the County.

It is anticipated that no interdistrict agreements to transport waste into or out of the County will be developed at the present time. The New Jersey Department of Environmental Protection has directed the City of Vineland to accept waste from the Borough of Newfield.

At a later date, waste from outside the district may have to be refused and redirected along with some waste from Cumberland County to approved sites in surrounding counties.

*A narrative describing any relevant aspects of these agreements should be provided.

SOURCE: Municipal officials

Table 4,5- Narrative

The predominant method for transporting solid waste to a landfill in Cumberland County is by private individuals, businesses, and industries hauling their own waste or contracting with a hauler to do so. The City of Millville has its own residential curbside pickup. Four municipalities provide residential pickup as shown on Tables 4 and 5A. Additional bulk pickups are made in the following municipalities for large items, leaves, grass cuttings, or brush: Bridgeton, Millville, Upper Deerfield, and Vineland.

The many private solid waste haulers are listed on Table 5B. Smaller contractors tend to specialize in certain areas. Many local businesses and industries prefer to haul waste in their own vehicles. When the new county landfill opens, the new location and greater haulage distances may affect this pattern.

As available landfill space has decreased and tipping fees have increased, there has been more emphasis on recycling/source separation activities. In addition to the voluntary drop-off centers in Greenwich, Stow Creek, and at local recycling markets, Vineland has initiated a mandatory source separation curbside pickup effort in District #1. Millville has been awarded a grant and will soon begin a curbside pickup of recyclables. Fairfield Township has been awarded a litter abatement grant and will begin education efforts for recycling. Bridgeton and Hopewell Township have initiated advertising campaigns to encourage recycling. Several municipalities are planning to apply for recycling funds as shown on Table 7.

It is expected that the goal of recycling ten percent (13,000 tons per year) of the solid waste in Cumberland County will be met in 1985. This will be accomplished by planned intensified efforts by the individual municipalities and as part of the operation of the new county landfill when it opens in 1984.

Table 6, 7

Currently, the Solid Waste from 14 communities within the County is directed to 10 municipally operated landfills. Residents of 5 municipalities (Greenwich, Millville, Shiloh, Upper Deerfield, and Stow Creek) must dispose of their waste at facilities in neighboring communities. When the regional landfill becomes operational January 1, 1985, all 14 municipalities will direct their waste to the new facility.

Three municipalities have initiated source separation activities to reduce waste flows and to lengthen the life of the existing landfills. Greenwich and Stow Creek Townships collect glass at drop-off centers. Vineland has a mandatory program of curbside collection of glass and newspaper. Additionally Recycling or litter abatement programs are planned in Bridgeton, Millville, and Fairfield, Hopewell, and Stow Creek Townships.

Table 8, 9 - Narrative

The proposed Amendments to the Cumberland County Solid Waste Management Plan designated a single landfill to serve the entire solid waste district. The Plan, as modified, had called for 2 landfills - one to be located in the western part of the County and another to be located in the eastern part, both to be operational by 1983.

The proposed district landfill is now scheduled to be operational January 1, 1985. The 1,300,000 ton capacity landfill will serve the needs of the County for the 10 year planning period. The site of the proposed landfill is in Millville and Vineland south of Sherman Avenue and west of the Maurice River.

Table 8 documents a disposal strategy for the period covering 1982 - 1992. Table 9 presents the proposed implementation schedule for the development of the new regional landfill.

Table 10, 11, 12 - Narrative

The County began solid waste planning efforts with the appointment of the Solid Waste Advisory Council and development of the Cumberland County Solid Waste Management Plan in 1979. The Plan was modified in 1980 in response to comments of DEP and a Source Separation Feasibility Study was done.

Subsequently, the Board of Chosen Freeholders appointed 5 members to the newly organized Improvement Authority to implement the approved Plan. The Authority contracted with an engineering consultant to develop reports on resource recovery and landfill design. Solid waste planning activities continue to be on-going under the guidance of the Board of Chosen Freeholders and the Improvement Authority.

Throughout the planning process, efforts have been made to involve municipal officials and residents. Improvement Authority meetings have been open to the public and comments from the audience are always allowed at the conclusion of each meeting. Each municipality also appointed someone to act as a liaison with the Authority. Additionally, efforts are currently underway to establish a Recycling Committee to involve all 14 municipalities in the promotion of source separation.

COMPLETED AND PLANNED SOLID WASTE STUDIES
1979 to Present

Table 1.0

Type of Study: (Feasibility, Engineering, Site Assessment; Preliminary or Final, etc.)	Completion Date (Actual or Expected)	Cost	Consultant/Contractor or (In-House)	Source of Funds	For Completed Studies: Brief Summary of Procedure & Findings
Solid Waste Management Plan Plan Modifications	Sept. 1979 Dec. 1980	\$ 51,800	RAS Associates	State/ local	All landfill close by 12/82. Open new eastern and western landfills. Consider resource recovery options.
Source Separation Study	1980		Cumberland County Planning Board		22% municipal of solid waste is recyclable
Resource Recovery Study	Nov. 1981	29,500	Sheaffer & Roland, Inc.	State/ local	A single county landfill is most cost-effective and environmentally sound. Resource recovery could perhaps be implemented in the future.
Landfill Basis of Design	Dec. 1981	18,500	Sheaffer & Roland, Inc.	State/ local	A hill fill design with day lining, leachate collection and gas venting is most economical and environmentally sound.
Landfill Design (Proposed)	Oct. 1983	200,000	Consultant	State/ local	Includes environmental impact statement and construction drawings and specifications for the selected landfill.

Approval Of Update To The Cumberland County
Solid Waste Management Plan

WHEREAS, N.J.S. 13:1E-20 provides for automatic review of the County's solid waste plan at least every two years following approval thereof; and

WHEREAS, the Board of Chosen Freeholders has reviewed the County's solid waste management plan, as amended, and finds that certain information should be updated;

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF CHOSEN FREEHOLDERS OF THE COUNTY OF CUMBERLAND, as follows:

That the Board hereby approves the Update To The Cumberland County Solid Waste Management Plan prepared Sheaffer & Roland, Inc. consisting of 45 pages, a copy of which is on file with the Clerk of this Board.

Passed and adopted at a regular meeting of the Board of Chosen Freeholders of the County of Cumberland, held at the Court House, Broad and Fayette Streets, Bridgeton, New Jersey on Thursday evening, July 14, 1983 at 8:00 o'clock prevailing time.

DATED: July 14, 1983
