Improving your tomorrow.

July 2024

## What's New at The Authority?

### Rowan Medicine Building Ribbon Cutting

The ribbon cutting for the Rowan Medicine Building took place on Tuesday, June 11 at the Rowan College of South Jersey Cumberland Campus. This state-of-the-art facility will house three vital programs that will significantly benefit the citizens of our county: the C.A.R.E.S. Institute (Child Abuse Research Education & Service Institute), the N.M.I. (NeuroMusculoskeletal Institute), and the R.I.S.N. Center (Regional Integrated Special Needs Center). This new addition to the 'Eds and Meds' corridor will greatly enhance healthcare and education in our community.

### Cape May Library Ribbon Cutting

The ribbon cutting for the new Cape May City Branch Library occurred on Thursday, June 13. Activities began with a "book brigade," in which volunteers lined up along the quarter-mile distance between the old and new libraries, to hand-transport the last 100 books. After speeches by local dignitaries, and appearances by state officials, the public was let in to the new library for the first time. With approximately 300 to 400 people in attendance for the dedication, and more arriving through the afternoon, the opening was a tremendous success.

Cape May Library

### Synagro Ribbon Cutting

The ribbon cutting for the new Cumberland County Biosolids & Organics Recycling Center took place on Thursday, June 27. The facility is a state-of-the-art 103,000-square-foot, in-vessel composting process building, utilizing automated aeration, and turning equipment. New Jersey generators will be able to leverage Synagro's investment in green infrastructure for biosolids and organics management, thereby producing approximately 38,000 tons of Class A compost annually. Synagro has teamed with The Authority to provide the facility with renewable energy, creating a highly sustainable, environmentally and community-friendly solution.

### Rowan College of South Jersey Radiology Lab

Renovations to the Rowan College of South Jersey Radiography Lab are nearly complete. The project converted the existing demonstration only Radiography Lab into a true Radiography Lab with functional X-Ray equipment. Work began with the removal of the existing equipment on May 7. The general contractor began demolition and reconstruction immediately after graduation on May 10. The work involved adding lead sheeting to certain walls to act as a barrier to the X-Rays and construction of a larger control area for the students to observe the X-Ray process behind shielded walls and windows. General construction is substantially complete, and the work passed final building and electrical inspections. Punch list work is in progress, and installation of the new X-Ray equipment is nearing completion. The room will be ready for classes for the fall semester.

Radiology Lab

### Salem County Courthouse

Work continues to progress at the Salem County Courthouse. Building A renovations are ongoing. Walls are being prepped for painting, while electrical and systems wiring and cabling continues. The ceiling grid is complete and light fixtures have been installed. The ceiling tile will be installed upon final above ceiling inspections. Existing Courthouse CUPOLA has been removed, with new CUPOLA steel being installed. The SALLYPORT (Prisoner Intake) footing, foundations, and slab have been started.

Salem County Courthouse

### Millville Library

The Millville Library project nears completion with the renovations to the existing library. Flooring is complete and interior finishes will be completed the first week of July. Furniture has been delivered. The library is closed to the public from June 24 through July 9 to accommodate the move into the new space and to prepare for the Grand Re-Opening. The exterior upgrades and finishes will be complete the first week of July. This includes the new art wall, donated by Northeast Precast, and artwork, donated by the RCSJ Fine Art/Clay College/AIC program. TCO/CO is expected by the middle of July 2024.
